At flustix, licence holders gain access to established certification programmes combined with comprehensive support services. Conformity assessment and certification decisions are carried out independently by a certification body approved by flustix.

The licence fee includes the agreed use of the certification mark as well as general support regarding Green Claims, market, stakeholder and regulatory matters. Upon request, flustix also provides guidance on product communication.

Good to know

Different variants of a comparable product, such as different sizes or fill quantities, may be covered under a single licence, provided they fall within the confirmed certification scope.

Changes to the formulation, material composition, recycled content, manufacturing process or production site may require an additional assessment or laboratory testing. The decision is made by the responsible certification body.

No additional licence fees apply provided the variants remain within the same certification scope. Any additional certification or laboratory costs remain unaffected.

Additional Services

flustix Attestation:

one-off fee: €300

- ✓ Supplementary explanation of the analytical or test results
- ✓ Presentation of relevant laboratory-detected measurement results
- ✓ Additional supporting document for submission to authorities and stakeholders
- ✓ Does not replace the certificate or certification decision

Trustmark in in additional languages:

one-off fee: €200 per language

- ✓ Certification mark and claim in additional approved languages
- ✓ Use within the agreed certification scope

Additional Information

- Licences for different flustix programmes and packages can be combined for the purpose of licence fee calculation.
- The requirements of the individual certification programmes remain unaffected.
- Individual agreements for start-ups and large product portfolios are available upon request.
- Net prices excluding certification fees, laboratory costs and applicable VAT.

Full Cost Transparency: Following portfolio alignment with flustix, the applicant receives a binding quotation from the certification body. Certification and laboratory costs are only incurred once the order has been placed.

Validity: This licence fee structure applies to licence agreements concluded on or before 30 September 2027. The individual quotation and the respective licence agreement shall prevail.
